EXPO 2020 DUBAI

Kazakhstan Pavilion

KAZAKHSTAN The Gateway to Tomorrow
كازاخستان بوابة الغد

Main Show
„Unlimited Space“

The final Main Show was the dramaturgical highlight of the exposition. It showcased an emotional narrative of a `vision of living in the future‘ to the international public. The live performance consisted of a multimedia, high-tech show with a 270-degree panorama cinema and an acrobatic interaction with a KUKA KR 240, demonstrating the intricate synergy between a human and an `intelligent‘ robot.

An immersive setting and our 270-degree simulation allows the audience to be part of this imaginary science fiction world.
The message was: Only people who have the courage to embrace new technology can connect with the future and play an active role in shaping it.

Reflecting the EXPO‘s slogan „Connecting Minds, Creating the Future”, we orchestrated a very special kind of connection in the Main Show.
